

KRX Rear Camera Plug n Play Kit

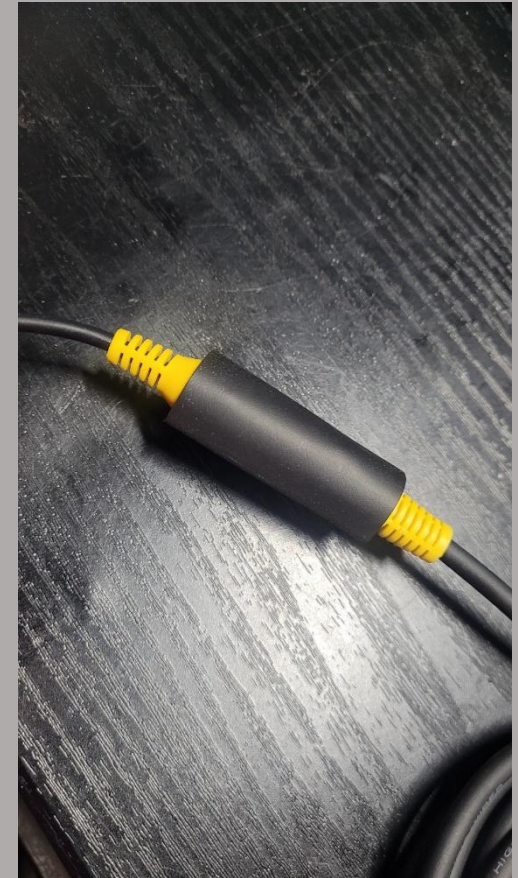

1. Follow Directions on mounting rear camera onto KRX

3. Route power/ground wiring & RCA cable through center console to head unit area

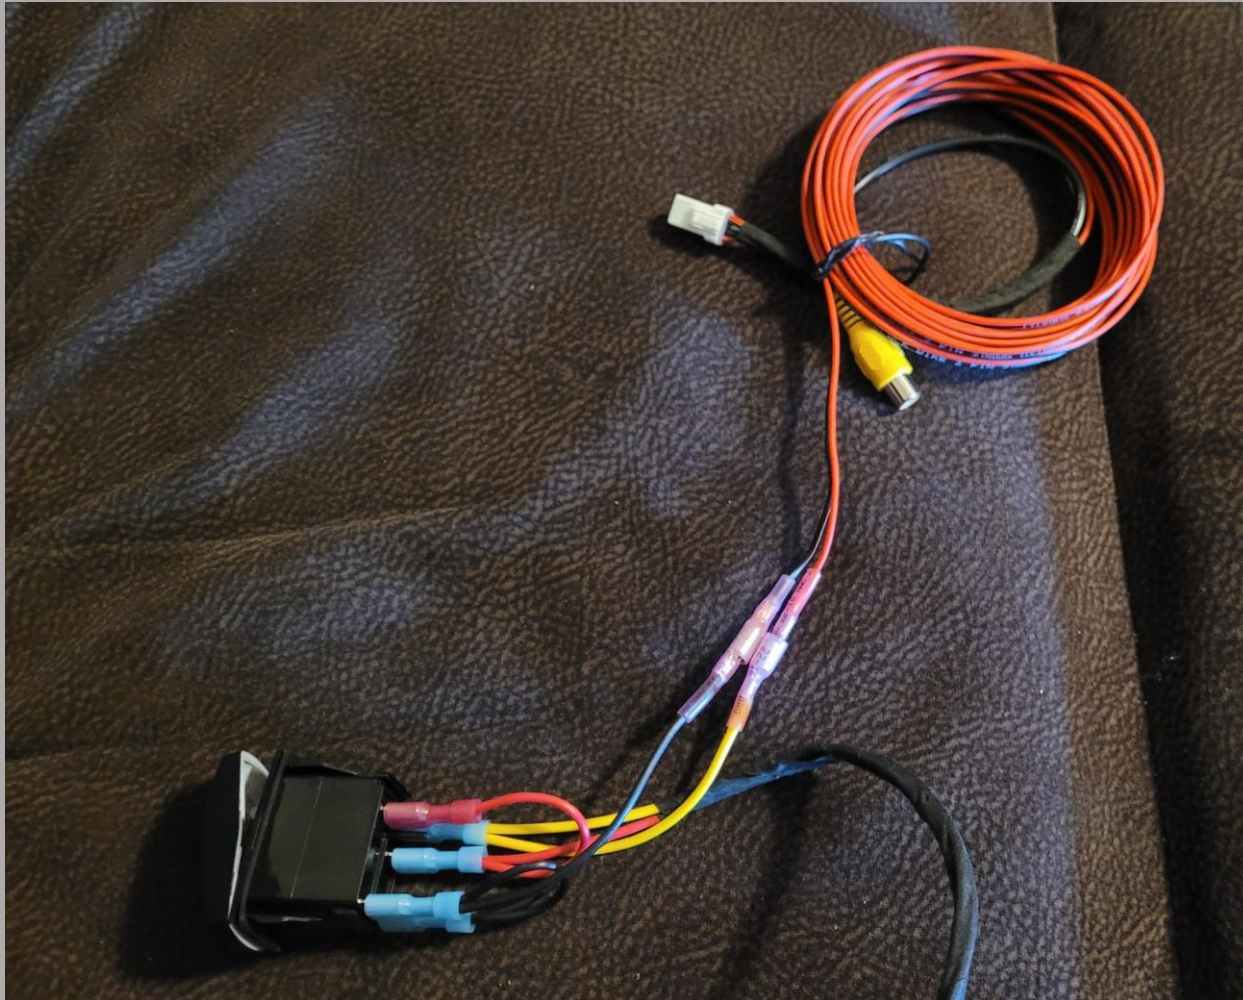

2. Plug wiring adapter with white plug to camera plug & use provided heat shrink over RCA connection to ensure they won't come apart

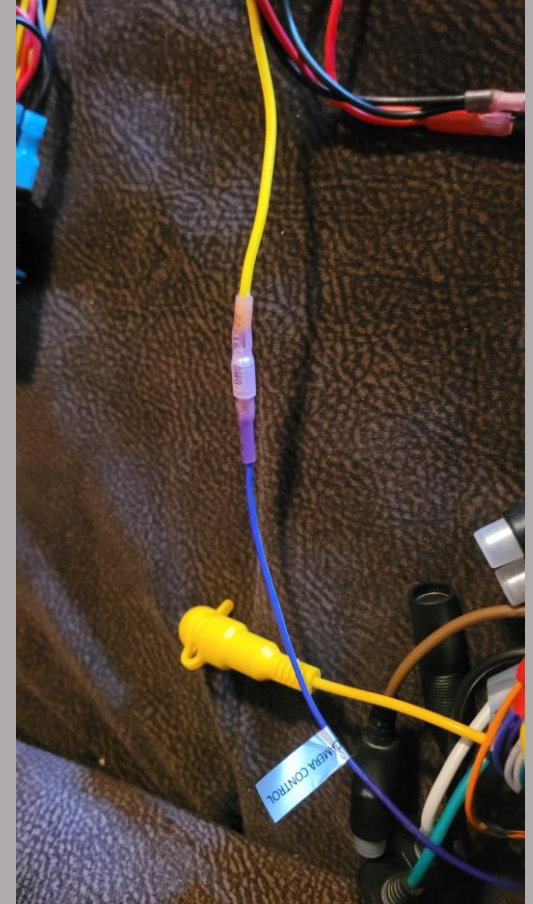

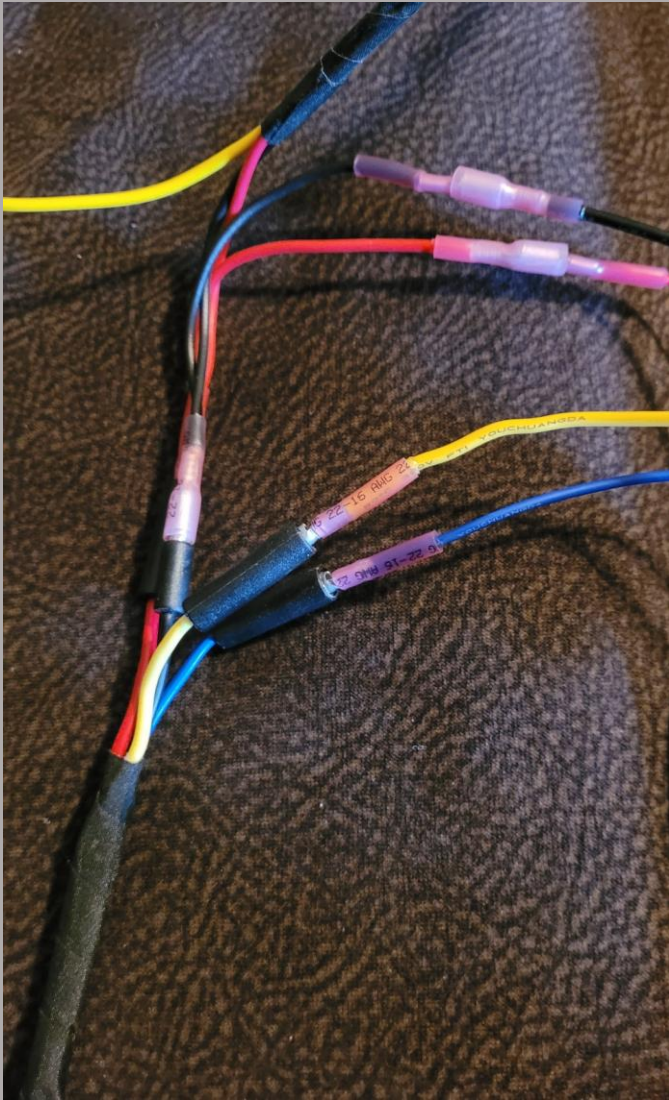

4. Once wiring is run to center dash where head unit is. Take switch & put wiring through rocker switch opening anywhere on dash & push into place. Plug power wiring connectors from rear camera to the rocker switch.

Switch black wire goes to black camera wire
Switch Yellow wire goes to red camera wire

5. Plug switch wiring harness (Red & Black) between the cassis harness & head unit harness. Then plug Yellow switch harness wire to head unit camera switch wire.

MR3=Purple wire MC150=Pink wire

6. Plug RCA cable that is connected to camera adapter.
Now you will be able to use your camera with the rocker switch

MC150= RCA Camera Input

MR3= Brown RCA Camera Input
